

Monetary Unit Sampling For Large Accounting Firms

CASE STUDY

INDUSTRY | FINANCIAL SERVICES

The client was one of the big 4 audit firms stationed in more than 50 countries worldwide.

CHALLENGE

The client needed a comprehensive software solution that would assist them in determining the sample size and design.

SOLUTION

We developed a software solution that automates and enhances the use of MUS and reduces the chance of errors. The enterprise software is deployed in more than 50 countries, and the overall project is valued at around \$0.25 million.

IMPACT

Millennium helped the client develop a software solution that determined sample size, sample design, and extent of the error in MUS, saving efforts while estimating the amount of misstatement for a class of transaction.
